First Quarter 2018 Market Recap

Markets showed signs of volatility as investors feared an uptick in both global protectionism and inflation expectations. U.S. stocks (S&P 500) were lower as investors grew increasingly wary of these interest rate and trade concerns. Developed international markets (MSCI EAFE) similarly pulled back despite continued signs of economic growth. Emerging Markets (MSCI EM) continued to benefit from a weakening dollar and sustained growth. The broad fixed income market (Bloomberg Barclays Aggregate Bond Index) fell as inflation expectations heightened. The unemployment rate remained at 4.1%. Real GDP increased 2.9% in the fourth quarter after increasing 3.2% in the third quarter.

Index	1Q 2018
S&P 500 Index	-0.76%
MSCI EAFE Index ND	-1.53%
MSCI EM (Emerging Markets) Index ND	1.42%
Bloomberg Barclays Aggregate Bond Index	-1.46%

US Equity

	Growth	Blend	Value
Large	1.42	-0.69	-2.83
Mid	2.17	-0.46	-2.50
Small	2.30	-0.08	-2.64

Non-US Equity

	ACWI ex. US	EAFE	EM
Large	-1.21	-1.57	1.37
Mid	-1.06	-1.40	1.66
Small	-0.35	0.24	0.17

US Fixed Income

	High Yield	Agg	Gov't
Short	0.41	-0.52	0.23
Interm	-0.76	-1.05	-0.73
Long	-2.52	-3.57	-3.22

Three month returns ending 3/31/18. US Equity indexes are Russell 1000, 1000 Value and 1000 Growth; MidCap, MidCap Value and MidCap Growth; and 2000, 2000 Value and 2000 Growth. Non-US Equity Indexes are MSCI All Country World Index (ACWI) ex. US Large, Mid and Small Caps; MSCI EAFE Large, Mid and Small Caps, and MSCI Emerging Markets (EM) Large, Mid and Small Caps. US Fixed Income indexes are Bloomberg Barclays Capital (BBgBarc) High Yield 1-5 Yr, Intermediate and Long duration; BBgBarc US Agg 1-5 Yr, Interm and 10+ Yr; and BBgBarc US Govt Short, Intermediate and Long Durations.

Outlook

Markets struggled to stabilize after a spike in volatility caused investor unrest. Despite global economic data remaining positive and tax reform in the U.S. beginning to take effect, investors feared that an uptick in inflation expectations will cause central bankers to raise interest rates quicker than anticipated, thereby sapping momentum in global equity markets. In addition, investors grew concerned that trade-related rhetoric from both China and the U.S. grew more aggressive in the quarter, risking the sustainability of recent economic gains in the U.S. and abroad. Geopolitical tension with Russia and North Korea also remained high. Taken all together, a focus on long-term goals and objectives continues to be a prudent course, balancing downside risk at current valuations with the potential for upside performance.

Miami Beach Employees' Retirement Plan

Asset Allocation Summary

- The Miami Beach Employees' Retirement Plan had a total market value of $632,259,221 as of March 31, 2018, which represents a decrease of $8,239,105 from the revised December 31, 2017 market value of $640,498,326. These market values reflect an increase in the JP Morgan Infrastructure Fund market value which was reported to us after we completed our Q1 performance report.

- The overall decrease in the Plan's market value was the result of $10.8 million in net cash outflows and net investment gains of $2.5 million.

First Quarter, 2018 Performance Summary

Total Plan

The Employees' Retirement Plan had a return of 0.4% during the first quarter of 2018, and ranked in the 15th percentile of the total fund universe. This return beat the fund benchmark return of -0.7%.

Equity Portfolios

- Rhumbline Advisors S&P 500 Index fund returned -0.8% during the quarter, which matched the return of the S&P 500.
- The PIMCO StockPlus Total Return Fund returned -0.7% in the first quarter; which was slightly above the S&P 500 return of -0.8%.
- The Rhumbline Advisors S&P 400 Mid Cap Index portfolio had a quarterly return of -0.8% which matched the S&P 400 return.
- The Rhumbline Advisors S&P 600 small capitalization index portfolio had a first quarter return of 0.6%, which matched the performance of the S&P 600 Small Cap Index.

Fixed Income Portfolios

- The Rhumbline Bloomberg Barclays U.S. Aggregate bond fund returned -1.4% in the first quarter. This return slightly beat the Bloomberg Barclays U.S. Aggregate Index return of -1.5% and ranked in the 50th percentile.
- The Wellington fixed income portfolio returned -0.9% during the quarter, which was above the -1.1% return of the Wellington Benchmark and ranked in the 16th percentile.

International Equity Portfolios

- The Wellington International Quality Growth portfolio had a quarterly return of 3.5%, which was above its MSCI ACWI ex-US Growth benchmark return of -0.9% and ranked in the 13th percentile.

Emerging Markets

- DFA returned 1.8% in the first quarter, preforming above the 1.4% return of the MSCI Emerging Markets Benchmark. This return ranked in the 46th percentile of emerging markets equity portfolios.

Real Estate

- The JP Morgan Strategic Property Fund had a first quarter return of 2.2%, which matched the ODCE Index return of 2.2%.

Infrastructure

- The JP Morgan Infrastructure Fund had a first quarter return of 3.4%, which was above its S&P Infrastructure benchmark return of -5.5%.

For periods up to and including the 1st quarter of 1996, the Total Fund benchmark is 50% S&P 500 and 50% Barclays Intermediate Gov't/Corp Index; from 1st quarter of 1997 through 1st quarter of 1998, the benchmark is 50% S&P 500 and 50% Barclays U.S. Aggregate Bond Index; from 1st quarter of 1999 though the 3rd quarter of 2000, the benchmark is 40% S&P 500, 7.5% S&P 400 Mid Cap, 2.5% MSCI EAFE and 50% Barclays U.S Aggregate Bond Index. From the 1st quarter 2000 through the 1st quarter of 2006 the benchmark is 45% S&P 500, 10% S&P 400 Mid Cap, 5% MSCI EAFE and 40% Barclays U.S Aggregate Bond Index. From 2nd quarter 2006 to the 1st quarter 2010, the benchmark is 45% S&P 500, 10% S&P 400 Mid Cap, 5% Russell 2000Â®, 7% MSCI EAFE and 33% Barclays U.S. Aggregate. From 2nd quarter 2010, the benchmark is 39% S&P 500, 8% S&P 400, 4% Russell 2000, 18% MSCI EAFE and 31% Barclays US Aggregate Bond Index. From the 4th quarter of 2014, the benchmark is 39% S&P 500, 8% S&P 400, 4% Russell 2000, 13% S&P ADR, 11% Barclays US Aggregate Bond Index, 20% Barclays Intermediate Aggregate, and 5% MSCI Emerging Markets. From the 4th quarter of 2015, the benchmark is 32% S&P 500, 7% S&P 400, 4% Russell 2000, 11% S&P ADR, 11% Barclays US Aggregate Bond Index, 20% Barclays Intermediate Aggregate, 5% MSCI Emerging Markets, and 10% NCREIF ODCE. Beginning in the 4th quarter of 2016, the benchmark is 32% S&P 500, 7% S&P 400, 4% Russell 2000, 11% Bloomberg Barclays US Aggregate Bond Index, 20% Bloomberg Barclays Intermediate Aggregate, 5% MSCI Emerging Markets, 10% NCREIF ODCE, and 11% MSCI ACWI Ex. US. Beginning in the 3rd quarter of 2017, the benchmark is 29% S&P 500, 6% S&P 400, 4% Russell 2000, 9% Bloomberg Barclays US Aggregate Bond Index, 19% Bloomberg Barclays Intermediate Aggregate, 5% MSCI Emerging Markets, 10% NCREIF ODCE, 11% MSCI ACWI Ex. US, and 7% S&P Global Infrastructure.

- The Miami Beach Employees' Retirement Plan had a total market value of $632,259,221 as of March 31, 2018, which represents a decrease of $8,239,105 from the revised December 31, 2017 market value of $640,498,326. These market values reflect an increase in the JP Morgan Infrastructure Fund market value which was reported to us after we completed our Q1 performance report.

Net Contributions/Withdrawals

- Net cash outflows totaled approximately $10.7 million during the first quarter. The Rhumbline Aggregate had an outflow of $2.8 million, DFA had an outflow of $1.8 million, Wellington IQG had an outflow of $4.0 million, the Strategic Property Fund had a distribution payment of $669,000, the JP Morgan Infrastructure Fund had a distribution of $666,000, and the trust account had a net decrease of $848,000.

Investment Gains/Losses

- During the first quarter of 2017, the Retirement Plan experienced a net investment gain of approximately $2.5 million. The Retirement Plan's domestic equity managers posted a first quarter investment loss of $1.7 million; the international equity portfolios posted a gain of $3.4 million. The fixed income managers posted a loss of $1.9 million, the Real Estate manager posted a gain of $1.4 million, and the Infrastructure investment had a gain of $1.3 million.

Current Actual Asset Allocation

- As shown in the *Actual & Target Asset Allocation* table, as of March 31, 2018, the Retirement Plan had an allocation of 29.1% to the large cap domestic equity managers, 5.9% to mid cap equity, 2.9% to small cap equity, 28.0% to domestic fixed income, 12.1% to international equity, 4.9% to emerging markets, 10.3% to Real Estate, 6.3% to Infrastructure, and 0.1% to cash equivalents.

Total Fund Performance

- The Employees' Retirement Plan had a return of 0.4% during the first quarter of 2018, and ranked in the 15th percentile of the total fund universe. This return beat its benchmark return of -0.7%.
- Over the past year, the Retirement Plan's return of 11.9% is well above the 9.6% return of the Plan's benchmark and ranked in the 14th percentile in the universe of total funds.
- Total Plan returns were above or matching the benchmark over all other time periods.
- Since inception (January 1994) the Plan has returned 8.3% versus 7.8% for the total fund benchmark.

Equity Portfolio Performance

Rhumbline Advisors – S&P 500

- The Rhumbline Advisors' S&P 500 Index portfolio returned -0.8% in the quarter and matched the return of the S&P 500 while ranking in the 63rd percentile of passive large cap equity managers.
- Over the past year, the portfolio has returned 14.0%, matching the return of the S&P 500, and ranked in the 67th percentile.
- Longer term performance results are similar to the index, which extend to April, 1997.

PIMCO StockPlus Total Return

- PIMCO StockPlus portfolio returned -0.7%, which was slightly above the S&P 500 index return of -0.8%. PIMCO's first quarter performance ranked in the 57th percentile in the universe of large cap core equity portfolios. For the one year period, PIMCO returned 14.6% versus the S&P 500 at 14.0% and ranked in the 49th percentile. Two, three, four, and five year results are also above the benchmark.

Rhumbline Advisors – S&P 400 Mid Cap

- The Mid Cap index portfolio managed by Rhumbline returned -0.8% in the first quarter, matching the return of the S&P 400 Mid Cap benchmark. The first quarter return ranked in the 56th percentile of passive Mid Cap equity managers.
- Over the past year, the portfolio has returned 11.0%, which matched the index return, and ranked in the 69th percentile.
- Longer term results are comparable to the index, which begin in June 1998.

Rhumbline Advisors – S&P 600 Small Cap

- The Rhumbline Advisors' small cap index portfolio returned 0.6% in the first quarter, matching the return of the S&P 600 Small Cap benchmark. The first quarter return ranked in the 25th percentile of passive small cap equity managers. Over the past year the fund returned 12.7%, matching the benchmark return and ranking in the 52nd percentile.
- Longer term results are similar to the Index, which extend to January, 2007.

Fixed Income Portfolio Performance

Rhumbline Barclays U.S. Aggregate

- The Rhumbline fixed income index account returned -1.4% in the quarter, slightly beating the Bloomberg Barclays U.S. Aggregate return of -1.5% and ranked in the 50th percentile of fixed income portfolios.
- Over the past year, the account has returned 1.2%, matching the return of the Bloomberg Barclays U.S. Aggregate and ranked in the 82nd percentile of fixed income portfolios.
- Longer term results match the index and extend to July 2007.

Wellington Management

- The Wellington Management portfolio's first quarter return of -0.9% was above the benchmark return of -1.1% and ranked in the 16th percentile in the universe of intermediate fixed income portfolios. (For periods up to and including 1st quarter 1997, the Barclays Intermediate Gov't/Corp. Bond Index is the benchmark, and for subsequent periods through the 1st Quarter of 2013, the benchmark is the Barclays U.S. Aggregate Bond Index. Starting during the 2nd quarter of 2014, the benchmark became the Barclays Capital Intermediate Aggregate Bond Index).
- Over the past year, Wellington's return of 2.0% was above the 0.5% return of the benchmark and ranked in the 31st percentile.
- Longer term results exceed the benchmark in all periods, which extend back to October, 1993.

International Equity Portfolio Performance

Dimensional Fund Advisors

- DFA's Emerging Market Core equity portfolio returned 1.8% during the quarter, outperforming the 1.4% return of the MSCI Emerging Markets benchmark, and ranked in the 46th percentile.
- One year results are 22.9% versus 24.9% for the benchmark, and rank in the 61st percentile. Two, three year, and since inception results are better than the benchmark.

Wellington International Quality Growth

- The Wellington International Quality Growth portfolio had a quarter return of 3.5% which outperformed its MSCI ACWI ex-US Growth benchmark of -0.9% and ranked in the 13th percentile. Over the past year, the Wellington strategy returned 29.4% versus 19.9% for the benchmark.

Real Estate Portfolio Performance

JP Morgan

- The JP Morgan Strategic Property fund had a quarter return of 2.2%, matched the 2.2% return of the NCREIF ODCE benchmark. One and two-year results marginally trail the benchmark. Returns since inception, August 2015, are 8.6%, versus the NCREIF ODCE benchmark of 9.2%.

Infrastructure Portfolio Performance

JP Morgan

- The JP Morgan Infrastructure fund had a first quarter return of 3.4%, which outpreformed its S&P Global Infrastructure benchmark of -5.5%.

Investment Management Fee Summary

In the first quarter of 2017, investment management fees reduced performance for all Rhumbline Advisor accounts by approximately 1 bp, Pimco by 7 bps, Wellington fixed income by 7 bps, JP Morgan (Real Estate) by 25 bps, DFA by 16 bps, and the Wellington International portfolio by 18 bps. These results are similar to previous quarters and are as expected.

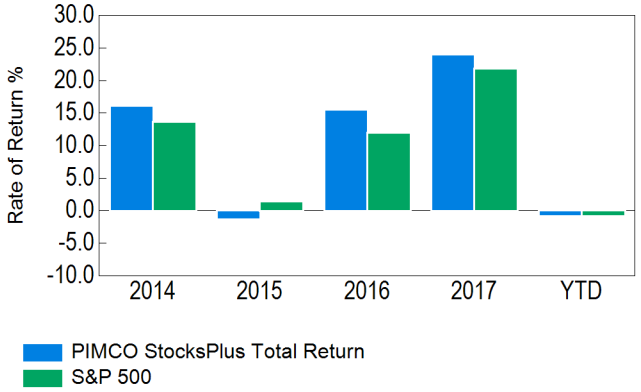
Ticker	PSPTX
Morningstar Category	Large Blend
Benchmark	S&P 500
Expense Ratio	0.64%
Fund Assets ($mm)	697.22
Share Class Inception Date	6/28/2002
Manager Tenure	4

Return Summary
Ending March 31, 2018



Description:

The investment seeks total return.
The fund seeks to exceed the total return of the S&P 500 Index by investing under normal circumstances in S&P 500 Index derivatives, backed by a portfolio of fixed income instruments. "Fixed income instruments" include bonds, debt securities and other similar instruments issued by various U.S. and non-U.S. public- or private-sector entities. The fund will normally limit its foreign currency exposure (from non-U.S. dollar-denominated securities or currencies) to 35% of its total assets.

Fund Characteristics as of December 31, 2017

Versus S&P 500

PIMCO StockPlus Total Return

The Fund seeks to exceed the total return of the S&P 500 Index by investing under normal circumstances in S&P 500 Index derivatives, backed by a portfolio of Fixed Income Instruments. Fixed Income Instruments include bonds, debt securities and other similar instruments issued by various U.S. and non-U.S. public- or private-sector entities. The Fund may invest in common stocks, options, futures, options on futures and swaps. The Fund normally uses S&P 500 Index derivatives instead of S&P 500 Index stocks to attempt to equal or exceed the daily performance of the S&P 500 Index. The Fund typically will seek to gain long exposure to its benchmark index in an amount, under normal circumstances, approximately equal to the Fund's net assets. The value of S&P 500 Index derivatives should closely track changes in the value of the S&P 500 Index. However, S&P 500 Index derivatives may be purchased with a small fraction of the assets that would be needed to purchase the equity securities directly, so that the remainder of the assets may be invested in Fixed Income Instruments. Pacific Investment Management Company LLC (PIMCO) actively manages the Fixed Income Instruments held by the Fund with a view toward enhancing the Fund's total return, subject to an overall portfolio duration which normally varies from (negative) 3 years to positive 8 years based on PIMCO's forecast for interest rates. Duration is a measure used to determine the sensitivity of a security's price to changes in interest rates. The longer a security's duration, the more sensitive it will be to changes in interest rates. The S&P 500 Index is composed of 500 selected common stocks that represent approximately two-thirds of the total market value of all U.S. common stocks. The Fund seeks to remain invested in S&P 500 Index derivatives or S&P 500 Index stocks even when the S&P 500 Index is declining. Though the Fund does not normally invest directly in S&P 500 Index securities, when S&P 500 Index derivatives appear to be overvalued relative to the S&P 500 Index, the Fund may invest all of its assets in a basket of S&P 500 Index stocks. The Fund also may invest in exchange-traded funds based on the S&P 500 Index, such as Standard & Poor's Depositary Receipts.

RhumbLine Advisers S&P 500 Index

RhumbLine initially managed the portfolio construction process by screening the stocks and eliminating those which do not have an acceptable quality rating by Value Line or Standard & Poor's, as well as companies not domestically domiciled. The screening excludes approximately 70 securities from the High Grade Index. This version of the Index was converted to a fully-replicating Index Fund in the 1stquarter of 2000.

To minimize tracking error, RhumbLine frequently rebalances the portfolio. There are three events which will trigger rebalancing. These events are:

Cash accumulates to 1% of the assets

Changes in the benchmark securities or restricted list

Major market changes

This policy results in portfolio rebalancing as often as each week, and no less often than each quarter. Each time this "micro-rebalancing" occurs, a list of required buys and sells, with acceptable alternative trades is produced which will bring the portfolio back into compliance with the S&P 500 Index. Typically, these trades represent less than 10% of the individual names in the portfolio, with less than 5% of the available assets. Historically, turnover has averaged less than 6%. In addition to frequent portfolio rebalancing, daily industry-sector weighting reports are reviewed to assure the portfolio is replicating risk and return characteristics of the S&P 500 Index.

RhumbLine Advisers S&P 400 Mid Cap Index

The portfolio for the Rhumbline S&P 400 Mid-Cap Index Fund has a construction and management process similar to that of the S&P 500 Index Fund. The methodology is a combination of a replication and stratification sampling process. The portfolio will hold approximately 375 issues. About 95% of the index, or 320 of the largest stocks in the index, are held in replicating weights. The remaining 5% are sampled; approximately 54 out of 80 stocks are held at weights of 0.10%. The sampled stocks are chosen so that industry weights of the index match industry weights of the portfolio.

RhumbLine Advisers S&P 600 Small Cap Index

The portfolio for the Rhumbline S&P 600 Small-Cap Index Fund has a construction and management process similar to that of the S&P 500 Index Fund. The fund consists of 600 small-cap stocks trading in the U.S with a market capitalization range between $250 million to $900 million. This represents approximately 3% of the domestic equity universe. The Fund has an annual turnover rate of 8 - 10%.

RhumbLine Advisers Bloomberg Barclays U.S. Aggregate Index

The RhumbLine investment team utilizes fixed income investment modeling technology to build and maintain the Core Bond Pooled Index Fund. As the objective of the Fund is to track the risk and return characteristics of the Bloomberg Barclays U.S. Aggregate Bond Index, all investment decisions are made with that as the primary goal. The benchmark has more than 6,000 fixed income instruments to select from so their process incorporates both optimization and stratified sampling in managing the Fund. Other analytical tools are utilized to evaluate fundamental credit research, market analysis of supply and demand and security structure analysis.

Wellington Management Company

Wellington Management Company manages a Bloomberg Barclays U.S. Intermediate Aggregate-based fixed income portfolio with an added High Yield component that is authroized to invest up to 20% in High Yield securities for the Miami Beach Employees' Retirement Plan. The objective of the portfolio strategy is to exceed the return of the Bloomberg Barclays U.S. Aggregate Total Bond Index through investments in intermediate and longer maturity, investment grade fixed income securities plus a High Yield component. Average maturity of the bond portfolios is typically between 8 and 12 years. Average duration ranges from 4 to 6 years, depending on the firm's interest rate outlook.

Intermediate Aggregate Bond portfolios typically emphasize corporate and mortgage securities over government and agency securities. The actual weighting of corporate and mortgage securities is a function of yield spreads and the firm's market outlook. Portfolio yield tends to be slightly higher than the Bloomberg Barclays U.S. Intermediate Aggregate Bond Index, while quality is typically slightly lower due to the emphasis on corporate issues.

The maturity/duration strategy decision is based on both macroeconomic data and bond market indicators. Changes in portfolio strategy normally occur slowly, rather than in sudden, large shifts. Wellington's strategic approach is somewhat contrarian; they tend to gradually increase portfolio duration as rates rise and vice versa.

Bond sector strategies focus on relative value and yield spreads across security types and among quality, issuer and industry sectors. Analysis of historical yield spreads is also used in establishing the sector strategy. Additionally, quality yield spreads are monitored for swap opportunities. The Bond strategy is supported by two groups within the company which supply fundamental and valuation information on two of the major domestic market sectors. These groups are the Mortgage Backed Strategy Group, and the Credit Screening Group.

Wellington Management Company (continued)

Wellington's corporate bond research effort is distinctive in that it focuses on avoiding down-gradings as well as on evaluating default risk. The fixed income research effort results in a Bond Universe of issuers pre-approved for purchase. Only securities issued by companies on the Bond Universe list may be included in the portfolio. The Investment Grade Bond Universe includes approximately 350 corporate debt issuers selected out of 700 investment grade bond issuers who have at least $50 million of public debt outstanding.

International Quality Growth Portfolio:

We believe that alpha generation requires a disciplined focus on investing in companies with five enduring attributes: high organic revenue growth, superior quality business models, low free-cash-flow valuation, capital return to shareholders, and improving fundamentals. In addition, consistent alpha generation requires high active share and downside protection is just as important as upmarket capture. Our approach leverages the extensive research resources of our firm in a disciplined approach to identify companies with: Superior quality business models, high organic revenue growth, low free cash-flow valuation, capital return to shareholders, and improving fundamentals. The investment process begins with the broad universe of securities included in international equity indices, such as MSCI ACWI ex US Index. Portfolio ideas also come from a combination of company meetings, investment conferences, field trips, and industry analysis. While the portfolio is not constrained by market capitalization, we typically invest in companies with a free float market capitalization exceeding US$3 billion and sufficient trading volume.

We focus on identifying market-leading companies with growing industry market share, quality balance sheets and strong management teams. Often these firms have a history of successful new product introductions, innovative ways of doing business, or have the opportunity to expand globally. We seek companies with positive long-term revisions, operating efficiency, and the ability to generate increasing return on capital. Within the course of our bottom-up research, industry themes and trends often emerge, which can provide a fundamental tailwind for purchase candidates.

Dimensional Fund Advisors Emerging Markets Core

The Emerging Markets Core Equity Portfolio is a no-load mutual fund designed to achieve long-term capital appreciation. The Portfolio seeks to purchase a broad and diverse group of securities with an increased exposure to securities of small cap issuers and securities that it considers to be value securities. In assessing value, Dimensional may consider factors such as the issuer's securities having a high book value in relation to their market value, as well as price to cash flow or price to earnings ratios. The criteria for assessing value are subject to change from time to time. The Portfolio invests in securities associated with a diverse group of countries, which may include both emerging and frontier markets, that Dimensional has designated as approved markets.

JPMorgan Strategic Property Fund

The Strategic Property Fund investment philosophy is based on the belief that consistently excellent investment results can be achieved by investing in a diversified portfolio of dominant, high-quality assets while maintaining a low risk profile across the portfolio. The Fund’s research-based portfolio construction process leverages the information advantage created by in-depth real estate expertise and firm-wide research capabilities.

The Fund invests in high-quality stabilized office, retail, residential and industrial assets with dominant competitive characteristics in primary markets with attractive demographics throughout the United States. Properties are well-leased generating significant operating cash flow and a high income return. The Fund does not invest in higher risk sectors such as hospitality, assisted living, self-storage, etc. New development is minimal. When presented with the right opportunity, the Fund will selectively capitalize on development opportunities in order to enter or extend the Fund’s presence in key markets with high quality assets but not exceed the Fund's maximum new development guideline of 5%. The Fund seeks to outperform the NCREIF Fund Index – Open End Diversified Core Equity Index (“NFI-ODCE” or “ODCE”) through asset, geographic and sector selection and active asset management.

JPMorgan Infrastructure Investments Fund

The Infrastructure Investments Fund offers investors a moderate-risk approach to infrastructure investing that is diversified primarily across OECD countries and by sub-sector. The Fund is designed to deliver stable returns, with a considerable portion of the return expected from cash yield over the long-term , by investing in a broad range of infrastructure assets primarily located in OECD countries.

Coupon- Bond instruments typically pay interest in the form of semi-annual coupon payments. If the annual coupon payment value is divided by the par value of the bond, the coupon rate is derived.

Duration- The bond portfolio duration most commonly referred to is the Macaulay duration. This is a weighted average maturity, expressed in years. All coupon and principal payments are weighted by the present value term for the expected time of payment.

Investment Gain/Loss- The difference in the total dollar value of the portfolio over the past quarter. Changes impacting the dollar value of the portfolio include realized and unrealized capital gains and all cash flows. Cash flows, either contributions or withdrawals, which are made by the plan sponsor are excluded from this calculation.

Income Yield- As referred to in this report, the income yield is calculated on common stock holdings, and is the ratio of the last twelve months dividend payments as a percentage of the most recent quarter-ending stock market value.

Market Capitalization- A security's quarter-ending market value or closing price times the number of common stock shares outstanding.

Maturity- The maturity for an individual bond is calculated as the number of years till principal payment. For a portfolio of bonds, the maturity is a weighted average maturity, where the weighting factors are the individual security's percentage of total portfolio market capitalization.

Percentile- For a range of investment manager performance results, from highest to lowest, a percentile is the performance range spanning one percent of the total range.

Price/Book Value- For an individual common stock, this is the stock's price divided by book value per share. Book value per share is the company's common stockholder's equity divided by the number of common shares outstanding.

Price/Earnings Ratio- The ratio of a common stock's price divided by earnings per share. The ratio is used as a valuation technique employed by investment managers.

Net Contributions- The sum of contributions to and withdrawals from a portfolio, exclusive of regular interest and dividend payments, and miscellaneous expenses.

Portfolio Beta- A common stock's beta, market risk, is the sensitivity of the stock's price in relation to a 1% change in the price of the market benchmark, the S&P 500. A portfolio beta simply weights the individual issues by their percentage of total portfolio market capitalization.

Return on Equity- For a common stock, this is the annual net, after-tax earnings divided by total common stockholder's equity.

Risk/Reward (Sharpe) Ratio- This is the difference in a portfolio's annualized return, for the past five years, and the annualized return for 90-day Treasury Bills, divided by the annualized standard deviation for the same time period. The statistic is a risk-adjusted return. The higher the value the better.

Standard Deviation- The degree of variability of a time series, such as quarterly returns, relative to the average. Standard deviation measures the volatility of the time series.
