

MIAMI BEACH

OFFICE OF THE CITY MANAGER

NO. LTC # 152-2016

LETTER TO COMMISSION

TO: Mayor Philip Levine and Members of the City Commission

FROM: Jimmy L. Morales, City Manager

DATE: April 7, 2016

SUBJECT: INDIAN CREEK DRIVE/ STATE ROAD (SR) A1A, 26 STREET TO 41 STREET - FLOODING MITIGATION PROJECT

The purpose of this Letter to Commission is to inform you that the City of Miami Beach in partnership with the Florida Department of Transportation (FDOT) will begin a flooding mitigation project along Indian Creek Drive/SR A1A Drive from 26 Street to 41 Street. The City will be entering into an agreement with a contractor to design and build the project.

The infrastructure improvements will include a new storm water drainage system, pump station and seawall. The existing roadway, curbs, gutters and sidewalks will be elevated to meet new flood elevation requirements. Driveways, light poles, signals, signage and pavement markings will be replaced to match new roadway alignment and configuration.

Pre-construction work is expected to begin within the next few weeks. Construction is anticipated to start in early summer, 2016. The project will be implemented in phases to minimize impact. Access to properties will be maintained at all times. On-street parking will be temporarily eliminated during the duration of the project. When necessary, police will be hired by the contractor to assist in guiding vehicles through the work zone. Maintenance of traffic bulletins will be updated as changes occur and weekly advisories will be distributed. The project is anticipated to last one year and will cost approximately \$25 million.

A Public Meeting will be held at the Miami Beach Golf Club, 2301 Alton Road, April 12, 2016, 6:00 p.m. to inform the community of the project and to seek comments.

A Facts Sheet and Meeting Notice are attached.

Requests for information will be directed to Heather M. Leslie, Project Public Information Liaison, 305.905.5876, heather@hmlpublicoutreach.com.

Indian Creek Drive/State Road (SR) A1A

Flooding Mitigation Project

Project Overview and Benefits

The City of Miami Beach Public Works Department in partnership with the Florida Department of Transportation (FDOT) will begin a flooding mitigation project along Indian Creek Drive/SR A1A to install a pump station and raise the elevation of the roadway and sidewalks to implement flooding solutions. The City will be entering into an agreement with a contractor to design and build this project.

The work will extend along Indian Creek Drive between 26 Street and 41 Street, is anticipated to last one year and will cost approximately \$25 million.

Scope of Work

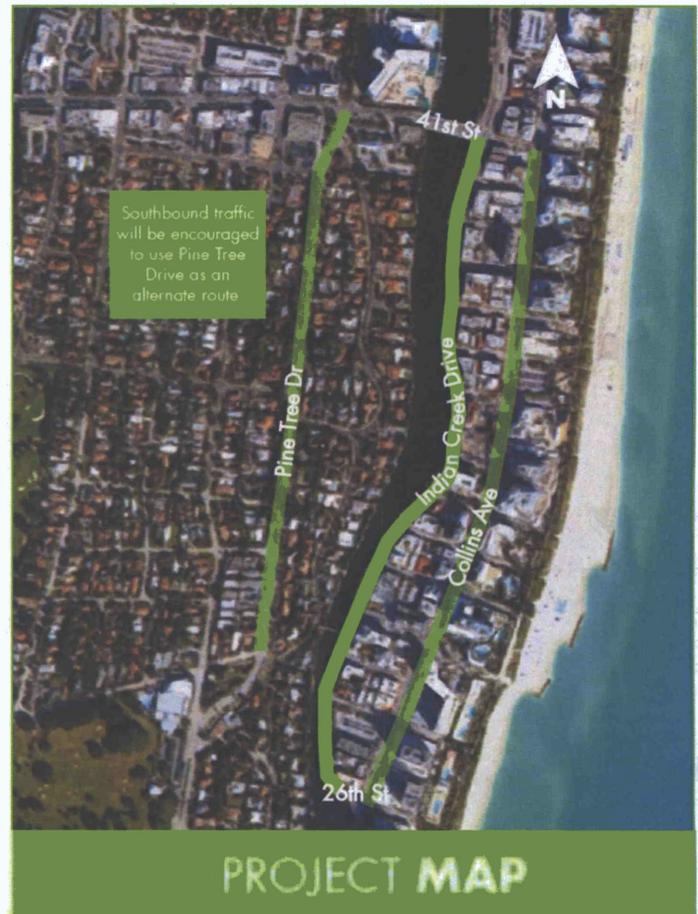

Infrastructure Improvements:

- Installing a new storm water drainage system, including a pump station at 32 Street
- Upsizing sections of the existing storm water drainage system
- Rebuilding the public sea wall between 26 Street and 41 Street

Roadway Improvements:

- Elevating the roadway
- Constructing new curb, gutter and sidewalks
- Installing new signage and pavement markings
- Installing new street lighting and performing minor signalization work
- Matching the new roadway elevation to existing driveways

Access to properties will be maintained at all times. On-street parking will be temporarily eliminated during the work.

Timeline

Pre-construction work is expected to begin within the next few weeks. Construction is anticipated to start in early summer, 2016. Please note this schedule may change due to weather or unforeseen circumstances.

PUBLIC MEETING

PlannedProgress
MIAMIBEACH

Indian Creek Drive/State Road (SR) A1A
26 to 41 Streets
Flooding Mitigation Project

Tuesday, April 12, 2016
6 p.m.
Miami Beach Golf Club
2301 Alton Road

Please join the City of Miami Beach and the Florida Department of Transportation (FDOT) to learn about the upcoming project to address flooding issues along Indian Creek Drive from 26 to 41 Streets. The purpose of the meeting is to explain the scope of work, impact to the surrounding area and to seek community input. Work will include raising the road, installing storm water drainage, including a new pump station. Construction is projected to last one year.
