Sunset Harbour Pump Station #3 Screen

Project Update - September 24, 2020

Project Overview and Benefits

In July, construction of the screen for pump station #3 located at the intersection of West Avenue and 20 Street in Sunset Harbour commenced.

The stainless steel screen will provide an attractive enclosure for this pump station, including its generator and electrical panels. In addition, the enclosure will serve as an entrance sign for the neighborhood with accent lighting incorporated into the eastern façade of the screen. Portions of the existing traffic barricade will be removed and replaced, and landscaping will be added adjacent to the signage on the eastern façade. The height of the screen will vary from nine feet above the traffic barricade adjacent to the generator, to three feet at the westernmost portion of the pump station.

What's New

In early September, concrete was poured and steel traffic plates were installed to allow the concrete to dry and reopen both sides of the street. Beginning on September 28, the installation of the screen panels will commence. During the screen installation, there will be intermittent road closures starting on the southbound lane, then on the northbound lane as required. Once the screen is installed, the entire intersection will be closed for asphalt restoration for a few days. Please heed all traffic signage.

Timeline

Project completion is expected before the end of the year. Work hours are weekdays from 8 a.m. to 6 p.m.; extended time is subject to city approval and community notification.

Please note, the project team is closely monitoring the situation surrounding COVID-19. The contractor is enforcing strict social distancing measures and employees are using face coverings while on site, including during break times

What to Expect

- Road closures, access will be restricted intermittently.
- Normal construction noise during work hours.
- Construction fence will be erected around the pump station, equipment and adjacent roadway.
