

YOUR VOICE, IN ACTION!

GO#24: Middle Beach Beachwalk

Project Update - December 17, 2020

Project Benefits

This beachside community amenity is part of the Greater Atlantic Greenway Network (AGN), which aims to support the use of alternative modes of transportation along the eastern seaboard. The project will remove the existing raised wooden boardwalk and replace it with an approximately 15-foot wide, on-grade, Americans with Disabilities Act (ADA)-accessible paver pathway that supports the use of bicycles, pedestrians and other non-motorized means of transportation.

What's Happening

The City of Miami Beach continues work on the Beachwalk project between 24 and 45 streets, including 11 street ends. The preexisting wooden boardwalk has been completely demolished and work is taking place along the entire project limit. Please note that due to the nature of the project, some areas may not see work taking place for a few weeks at a time. Ongoing work is a rolling operation and is taking place in a south to north direction.

The following activities are taking place now:

- Continuing installation of pavers between 44 and 46 streets
- Continuing the delivery of pavers and sand materials
- Electrical conduit work is complete and crews are running the remaining wiring in the northern sections between 44 and 46 streets
- Beginning installation of bollard lighting
- Continuing to frame and pour concrete for the structures at 38 and 39 streets
- Continuing installation of wooden posts at perimeter of dunes
- Continue with water, drainage and irrigation underground at street ends

What to Expect

Temporary beach access paths will be provided at the following streets: 24, 25, 27, 29, 30, 32, 36, 38, 39, 40, 42 and 46. The street end at 43 Street will remain temporarily closed as it is being used as the main entrance to the job site for machinery, trucks, etc. Pedestrians are asked to use the hardpack sand just east of the dune or Collins Avenue as an alternate north-south path.

Public beach access at 26, 37, 41 and 43 streets will be closed during construction.

Please note that during concrete work at the street ends, beach access may be temporarily closed for about two days while the formwork is underway.

Timeline

The project is anticipated for completion in June 2021, but every effort is being made to open sections of the beachwalk in spring of 2021, as they are completed and it is safe to do so. Work hours are from 8 a.m. to 6 p.m., Monday through Friday. Extended hours and weekend work days are subject to city approval and community notification.

Please note, the project team is closely monitoring the situation surrounding COVID-19. The contractor is enforcing strict social distancing measures and employees are using face covers while on site, including during break time. This schedule may change due to unforeseen conditions or weather.
