

MIAMIBEACH RISING ABOVE

Indian Creek Drive Flooding Mitigation Phase III

Project Advisory - June 18, 2021

Project Overview and Benefits

This project delivers vital improvements to the Indian Creek Drive community by providing new sidewalks, a lighting system and a continuous delineated bicycle path. It will also address flooding within the neighborhood by installing a comprehensive stormwater drainage system, including a water treatment system and generator in case of a power outage. Additionally, the road and sidewalk will be rebuilt at a higher elevation to mitigate sea level rise.

What's Happening

As part of a recently implemented traffic pattern, Collins Avenue now accommodates two-way traffic between 26 and 41 streets. Indian Creek Drive is closed. Traffic signage, barricades and temporary signals on Collins Avenue have been installed as part of the extended traffic plan. Ingress and egress for surrounding properties will continue to be maintained. Pedestrian crossings have been installed throughout the corridor as well as U-turn opportunities at certain locations.

For your safety, please do not enter work zones.

Motorists with Zone 6 residential parking permits may now use the P56 and P57 parking lots during construction.

The following activities are scheduled along Indian Creek Drive and side streets:

- Preparing a concrete leveling pad for barrier wall installation along Indian Creek Drive between 35 and 36 streets.
- Continuing to install new traffic signals, light poles and signage along Indian Creek Drive.
- Continuing to install the sheet pile wall, which requires the use of a crane, at various locations along the west side of the project corridor. This is likely to cause increased noise during the work.
- Continuing to install an underground drainage pipe and structures along Indian Creek Drive between 31 and 29 streets.

Harmonization continues between 26 and 30 streets. As part of the harmonization work, each property is responsible for regular maintenance of trench drains installed on private property to ensure proper drainage.

This schedule may change due to unforeseen conditions or inclement weather.

Timeline

The project started in March 2020 and is expected to last approximately two years. Construction work hours are weekdays from 8 a.m. to 6 p.m. Extended time is subject to city approval and community notification. This schedule may change due to weather events or unforeseen circumstances.

What to Expect

- Moderate levels of construction noise is expected during the day.
- Construction equipment, machinery and workers will be present in work zones.

An advisory will be issued every two weeks or as changes warrant.
