

MIAMIBEACH RISING ABOVE

Indian Creek Drive Flooding Mitigation Phase III

Project Advisory - October 1, 2021

What's Happening

Indian Creek Drive has reopened between 41 and 39 streets for standard passenger vehicles. This is expected to decrease congestion along eastbound 41 Street. Vehicles are permitted to turn south on Indian Creek Drive from 41 Street and east on 39 Street to continue south on Collins Avenue.

For your safety, please do not enter work zones.

Motorists with Zone 6 residential parking permits may use the P56 and P57 parking lots during construction.

The following activities are scheduled along Indian Creek Drive and side streets:

- Continuing to install new traffic signals, lights and poles along Indian Creek Drive.
- Continuing to install traffic railing and barrier walls along Indian Creek Drive between 39 and 31 streets.
- Continuing work at the pump station.
- Continuing to rebuild the roadway along Indian Creek Drive between 30 and 29 streets.
- Continuing to install drainage pipe and structures along 30 and 27 streets. Beginning drainage work on 28 Street.
- Continuing to pour curb and sidewalk along Indian Creek Drive south of 31 Street.

Harmonization continues south of 31 Street. Each property is responsible for regular maintenance of any trench drains installed on private property to ensure proper drainage continues.

Beginning on October 1, the on-demand Freebee Service as a response to the Indian Creek Drive project is being discontinued. The Middle Beach on-demand transit service will resume.

Project Overview and Benefits

This project delivers vital improvements to the Indian Creek Drive community by providing new sidewalks, a lighting system and a continuous delineated bicycle path. It will also address flooding within the neighborhood by installing a comprehensive stormwater drainage system, including a water treatment system and generator in case of a power outage. The road and sidewalk will be rebuilt at a higher elevation to mitigate sea level rise.

Timeline

The project began in March 2020 and is expected to last approximately two years. Construction work hours are weekdays from 8 a.m. to 6 p.m. Extended time is subject to city approval and community notification. This schedule may change due to weather events or unforeseen circumstances.

What to Expect

- Moderate levels of construction noise can be expected during the day.
- Construction equipment, machinery and workers will be present in work zones.

An advisory will be issued every two weeks or as changes warrant.
