Presentation Outline

- ① Project Background
- ② Project Overview
- ③ Existing Conditions
- ④ Proposed Alternatives
- ⑤ Questions/ Comments

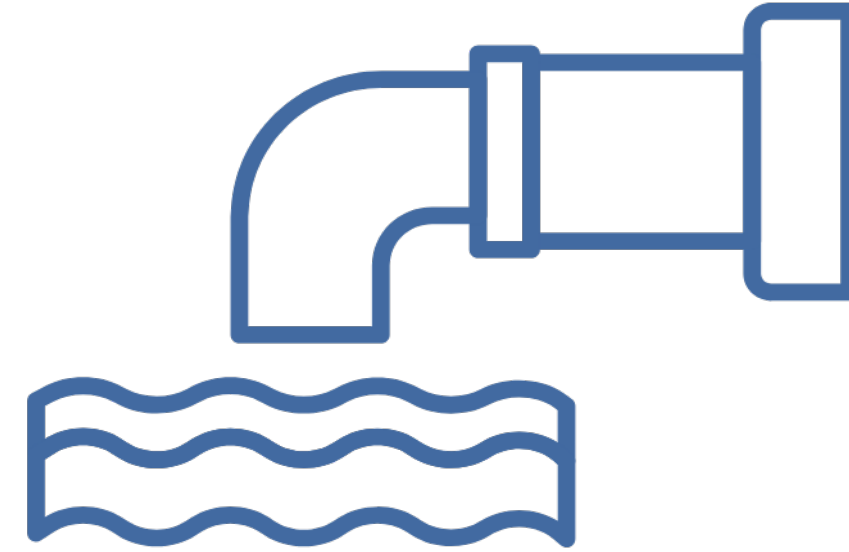

1

Project Background

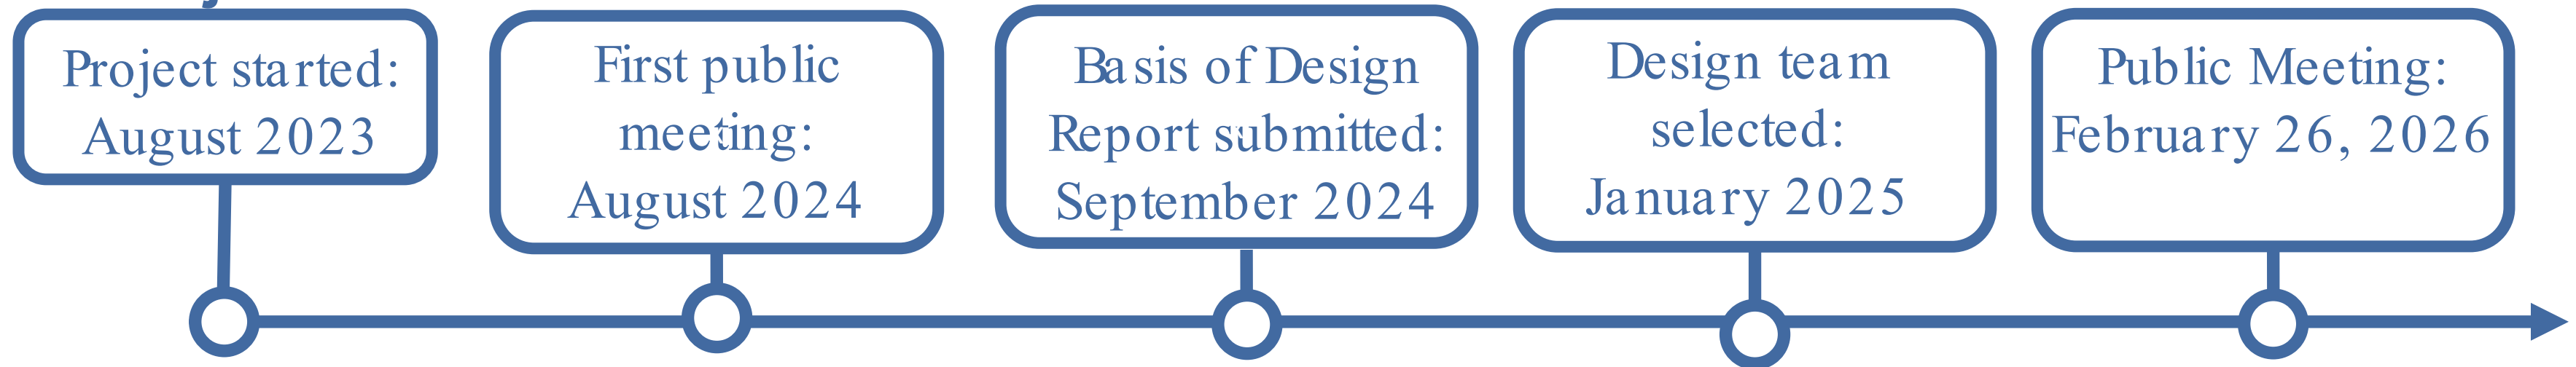

Project Background

Reason for Project

- Water ponds on streets
- Aged infrastructure
- Outdated traffic signalization
- Roadway pavement reaching end of life
- New developments in neighborhood require water and sewer infrastructure improvements
- Corridor lacks facilities for bicyclists and doesn't provide sufficient pedestrian crosswalks

Project Timeline

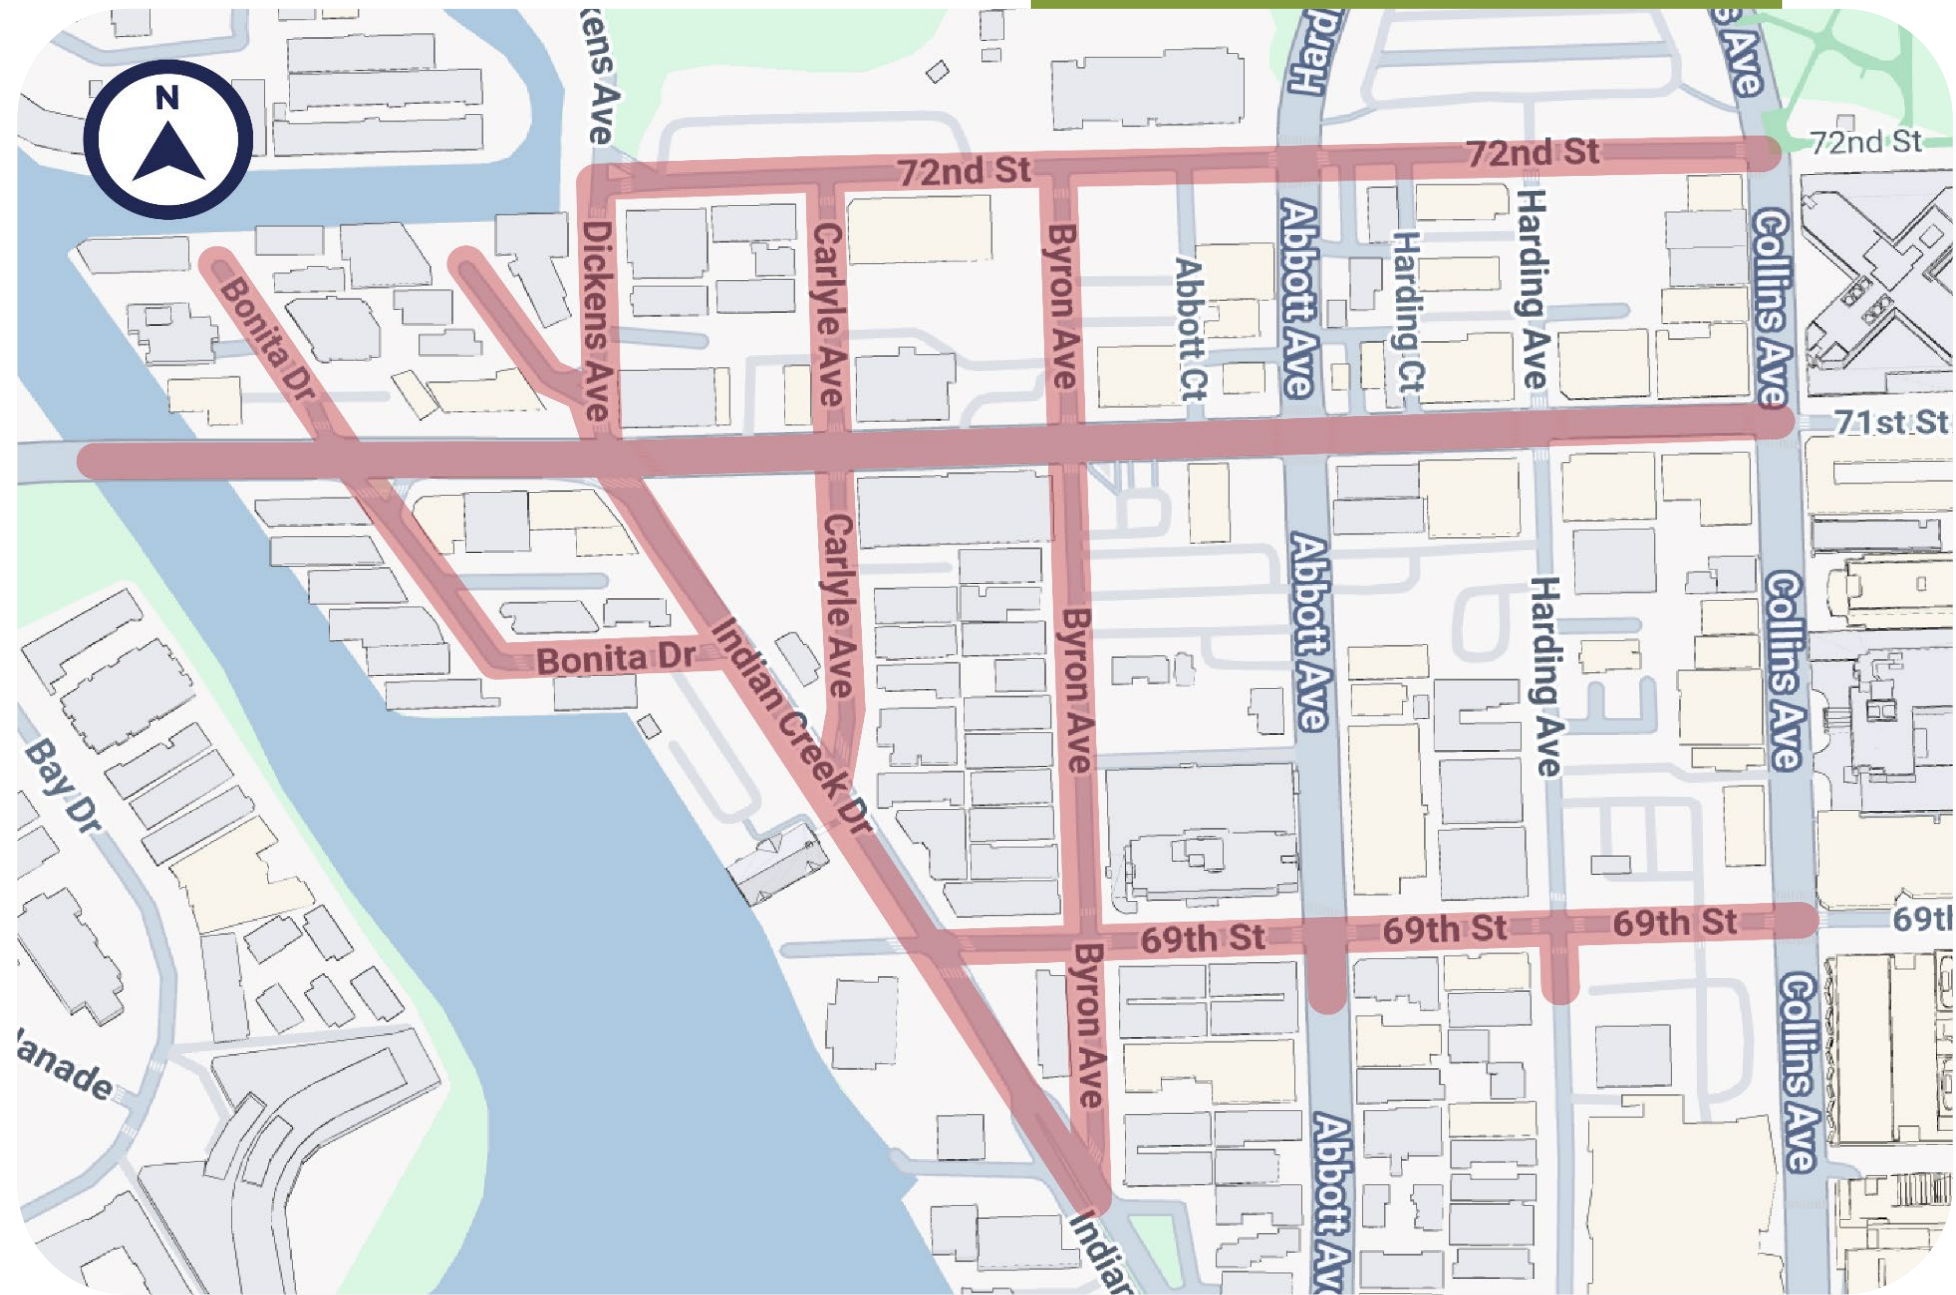

2

Project Overview

Project Limits

Phase 1A Limits

Scope of Work

Project Improvements

- Upgrade the stormwater system with larger capacity pipes, new pump station and improved outfall
 - Install a new pump station behind Police North Shore Sub-Station
- Improve water quality through the installation of nine water quality injection wells and multiple pollution control structures
- Replace and modernize sanitary sewer and water systems
- Raise roadways to reduce flooding
- Harmonize private property to ensure safe and accessible transitions to raised roadways
- Enhance resilience and aesthetics through pedestrian-friendly walkways, landscaping, lighting and signal improvements
- Add green painted bicycle lanes where possible
- Team also conducting a traffic study to evaluate future potential bus lanes or reconfiguring travel lanes

Deauville Parking – July 2026

3

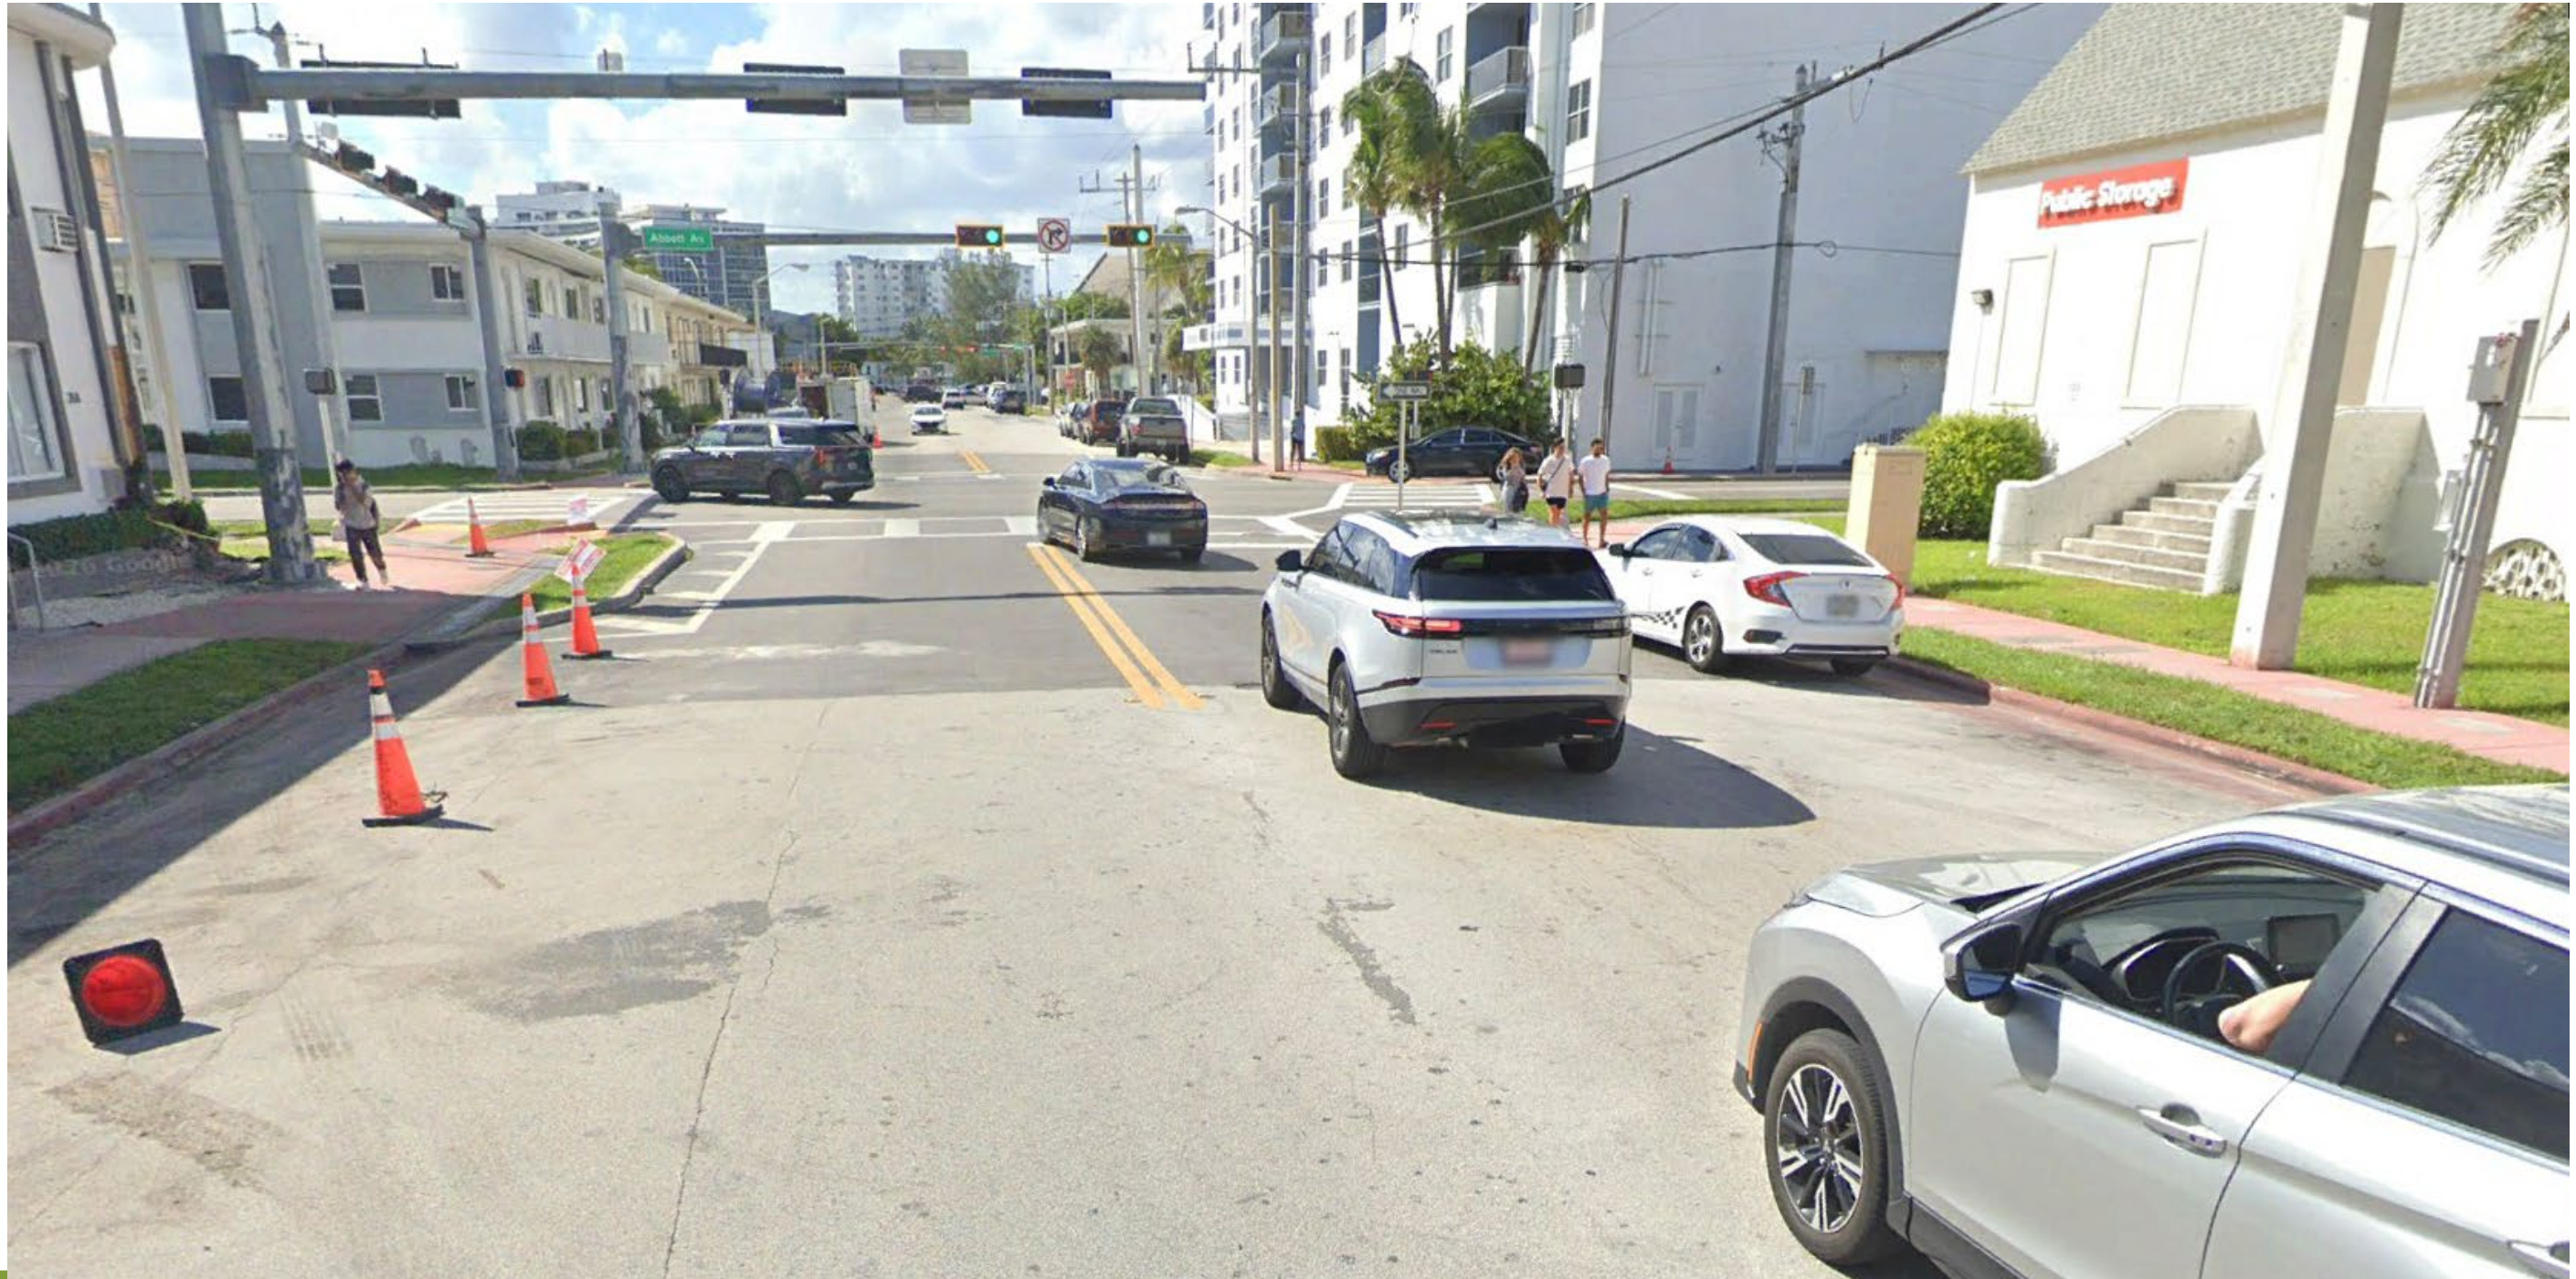

Existing Conditions

Existing Conditions

- Traffic queues at the intersection
- Major backups
- Takes multiple green lights

Existing Conditions

4

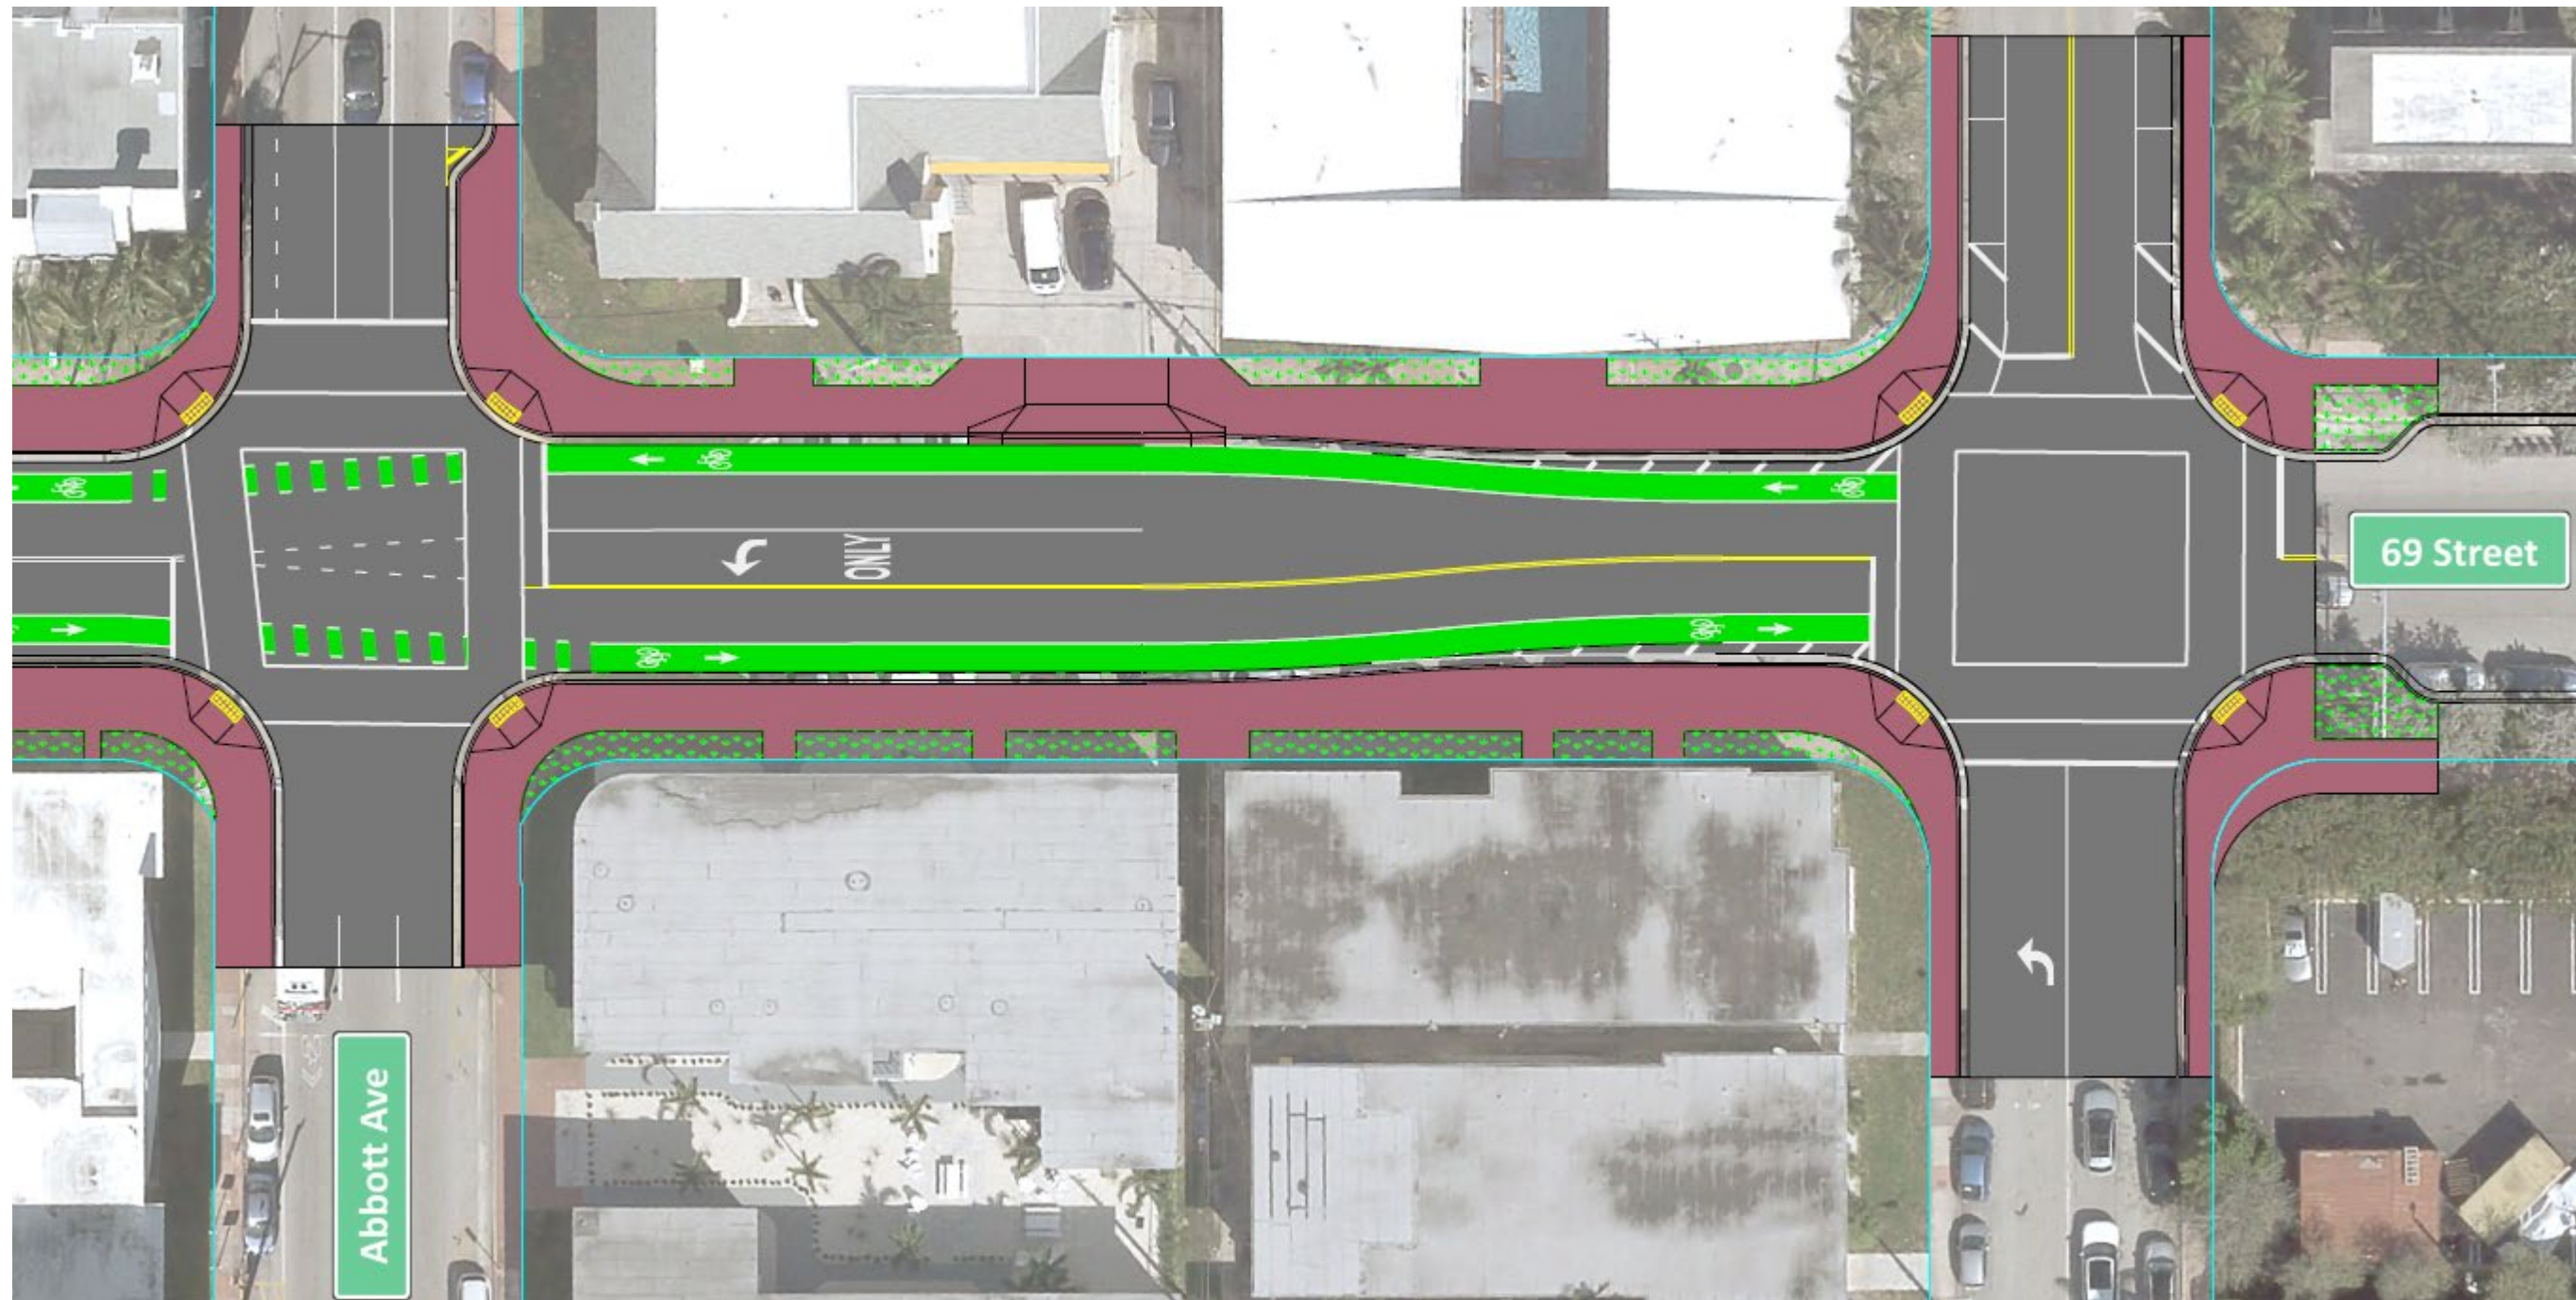

Proposed Alternatives

Proposed Alternative A

- Alternative mimics existing alignment
- Does not provide a left turn lane onto Abbott Ave
- Traffic will remain queuing and backing up
- Parking is not impacted due to the turn lane

Proposed Alternative B

- A turn lane onto Abbott Ave is added
- Traffic queuing will be reduced
- Parking is impacted due to the turn lane
