

Statement of Change: Engineer

I, _____ as successor architect for the project located at:
_____ for permit number _____ do hereby attest that I take all professional and legal responsibility for the documents which I have sealed and signed and can in no way exempt myself from such full responsibility. As successor professional engineer, I have used my own title block, seal and signature and must remove the title block, seal and signature of the original professional engineer before sealing, signing and dating any sealed contract documents as required by Florida Administrative Code 61G15-27.001 and Florida Statute 471.

I also attest that I made every effort to notify the original professional engineer of my intention to use or reuse the original professional engineer's work and take full responsibility for the drawings as though they were my original product. Furthermore, I can provide documentation of such effort as required by Florida Administrative Code 61G15-27.001 and Florida Statute 471.

I further understand that reliance upon and legal use of another's engineering work, in the normal course of providing original service, is not reuse or adoption of such other engineer's work as contemplated by Section 471.025(4), F.S. Such engineering work includes but, is not limited to, geotechnical reports, soil investigation reports, legal surveys, and other works that may be sealed but which are used to support the professional engineer's work and are not adopted as the professional engineer's original service or work product.

I further attest that there have been no changes, alterations, omissions, or additions to the previously approved plans other than the change of the title block.
