The following is a list of requirements for use of haze inside an assembly occupancy:

- A technician from the fire alarm company must be scheduled by the client to disable and enable the fire alarm zone.
- The fire alarm zone cannot be disabled until a fire watch is established for the affected area.
- A fire watch will be staffed by a Fire Inspector provided by the Miami Beach Fire Department.
- If applicable, a floorplan should accompany this request for approval by the fire department.
- Water based haze fluid is the only acceptable agent for use in assembly occupancies.

**\*Permit must be on site during all phases of operation\***

*Below to be completed by the Miami Beach Fire Department will serve as the permit:*
